## BITTER FIGHT ON UNDERWOOD TARIFF BILL

SPECIAL PRIVILEGE ATTACK HAS BEGUN BY ENDEAVORING TO WORK PANIC IN RANKS OF LABOR—BUSINESS MEN IN CONGRESS NOT WORRYING.

By Clyde H. Tavenner, M. C.

Washington, April 26.—The attack of special privilege upon the Underwood tariff bill has begun. All of the moth-eaten old scares—in the opinion of the thoughtful students of the tariff, they are but scarecrows—are being lugged out again, and a great many honest people will undoubtedly be frightened by them.

The first indication of the tactics to be used by the beneficiaries of special privilege came in the press-agented mass meeting of linen workers in New York state. A desperate attempt is to be made to throw the working men of the country into a panic by parading before them the bogey of hard times.

But before they allow themselves to be stampeded, the people should consider who are behind this old stand-pat argument against tariff revision downward. Are the working men themselves doing it? Last fall's election figures show that the working men of the country voted almost solidly for the democratic party which was pledged to make just the sort of tariff revision that is contained in the Underwood bill.

No, those now inciting the cry of hard times, and urging the long abused public to reject the tariff revision before it is given a trial are the very ones who have profited by the robber tariff rates of the Payne-Aldrich law. Are they now so concerned for the welfare of the working people when during the sixteen years they have resisted inch by inch the slowly successful efforts of organized labor to make them disgorge some of the swollen profits they have been enabled to reap by iniquitous tariff rates?

The people should not be thrown into a panic by this old argument. For the first time in years the people have it in their power to abolish the trust-fostering republican tariff law. The Underwood tariff will put American business on a healthy foundation of thrift.

Business men in congress are not worrying. Representative J. H. Geoke, of Ohio, in the proprietor of a large chain factory in that state. During the consideration of the tariff bill by the democratic caucus he said to me:

"I just now voted for the Underwood duty on chains. It cuts the present rate in two. As conditions are now, this means that we will be unable to compete with Germany on some of the better sorts of chains. But we do not expect to close our factory on that account. We will go ahead, and in time we will meet the German competition. We will not meet by cutting wages, either. We will do it by improving our shop methods—by becoming more efficient."

And this fairly represents the view that honest and thoughtful manufacturers are taking toward the tariff.
